RELOCATION:

In marketing you to all of our corporate clients, it is important that we know where you would like to go, where you will go for a good opportunity, and where you will not go under any circumstances.

Please use the United States Map to list your geographical preferences, alternate areas of considerations, and undesirable locations by using one of two methods:

Either, shade the map as follows:

- Blacken all Desirable Areas:
- Cross-hatch Alternate Areas:
- Leave blank Undesirable Areas:

NOTE: Please choose carefully. You will be marketed in only those areas that you shade in as being either a Desirable or an Alternate Geographical Area of consideration.

Or, list all nine geographical areas and/or individual states under one of the following:

- Desirable Areas: _____
- Alternate Areas: _____
- Undesirable Areas: _____

NOTE: If you are completely open as to relocation, just write "Open" under Desirable Areas.

I certify that the professional information provided is true and accurate.
